DETAILED ACTION

Election Restriction

Applicant's election without traverse of Group I (Claims 1-10) and of the species found in example 5 in the reply filed on 8-04-2006 is acknowledged.

Claims 1-10 directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 11-17, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement of groups I and VII as set forth in the Office action mailed on 6-02-2006 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowance

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Barbara Kurys on 9-14-2006. (See Examiner initiated interview summary)

Examiners Amendment

- Cancel claim 11.
- Amend claim 13 to read: " A method of treating diabetes mellitus and squelae -- associated therewith comprising administering to a patient in need thereof a therapeutically affective amount of compound of formula 1.
- Cancel claim 15.
- Cancel claim 16.

Reason for allowance

The following is an examiner's statement of reasons for allowance: The compound of formula (I) was found to be novel. Closest art by Chen et al. (US 6,455,550 B1) discloses compounds that most closely resemble the compound of the

instant invention (column 134, example 187; column 142, example 210). The two generic structures are similar however the differences between them are not obvious. Substituent R4 in the instant application is defined as C₁-C₈ alkyl. In the said examples of US 6,455,550, the same substituent is a (4-(2,6-dichlorobenzamido)phenyl)methyl substituent. The difference between C₁-C₈ alkyl and (4-(2,6-dichlorobenzamido)phenyl)methyl substituent is considerable and they do not render each other obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
